ABSHealthcareLite Sample Data Dictionary

SECTION 1: EXECUTIVE SUMMARY

The **ABSHealthcareLite Sample Data Dictionary** is the official repository of standardized, realistic healthcare data to be used across the entire product lifecycle.

Purpose: To eliminate the use of unprofessional placeholders (e.g., "John Doe", "Test Patient 1") and ensure a cohesive, realistic narrative across all visual and training assets.

Benefits:

- **Consistency:** Ensures that a patient seen in a Registration mockup is the same patient seen in the Billing and Pharmacy mockups.
 - **Training:** Provides realistic scenarios for end-user training, helping staff relate to the system.
 - **Sales:** Enhances product demonstrations with professional, culturally relevant data that resonates with prospective clients.
 - **Documentation:** Standardizes user manuals and guides.
 - **Testing:** Provides a baseline dataset for QA and UAT environments.

SECTION 22: UI MOCKUP DATA STANDARDS

To maintain visual consistency across all mockups, the following formats must be strictly adhered to:

- **Date Format:** DD-MMM-YYYY (e.g., 15-Jun-2026)
 - **Time Format:** HH:MM AM/PM (e.g., 10:30 AM)
 - **Currency Format:** BDT (e.g., 1,500 BDT or ₳1,500)
 - **Phone Format:** +880 1X XXXX XXXX (e.g., +880 17 1111 0001)
 - **Patient ID Format:** PT-YYMMNNN (e.g., PT-260001)
 - **Doctor Code Format:** DR-NNNN (e.g., DR-1001)
 - **Invoice Format:** INV-NNN (e.g., INV-001)
 - **Admission Format:** IPD-NNN (e.g., IPD-001)
-

SECTION 23: TRAINING DATA STANDARDS

When future data needs to be generated for new modules or edge cases, creators must follow these guidelines:

1. **Use Local Context:** Names, addresses, and phone numbers must reflect a realistic Bangladeshi context.
 2. **Maintain Continuity:** If a new mockup requires an admitted patient, use an existing patient from Section 7 (e.g., Rafiqul Islam) rather than inventing a new one.
 3. **Clinical Accuracy:** Ensure that diagnoses match the prescribed medications and ordered lab tests (e.g., do not prescribe insulin for a patient diagnosed with a simple fracture).
 4. **No Placeholders:** Never use "Test", "Demo", "Asdf", or "1234" in any field.
-

SECTION 24: CONCLUSION

This **ABSHealthcareLite Sample Data Dictionary** is the mandatory, official data source for all visual and instructional materials related to the platform.

By utilizing this standardized, realistic, and culturally relevant dataset, ABSHealthcareLite ensures that all UI Mockups, User Manuals, Product Demos, Training Sessions, and QA Testing environments present a cohesive, professional, and highly credible representation of the software in action.
