7. Appendix C — Known Limitations
8. Appendix D — Sign-off

ABSHealthcareLite Manual Quality Control and UAT Guide

MOD-24 — Report Release & Delivery

Document control	Value
Module ID	MOD-24
Module name	Report Release & Delivery
Document version	1.1
Document status	NOT TESTED
Prepared date	24 July 2026
Prepared by	ABSHealthcareLite Development / AI QC Handoff
Environment	QC Docker (non-production)
Intended audience	Independent QC engineers and UAT representatives
Classification	Internal QC / UAT working document

****Status: NOT TESTED**** — execute in browser and attach evidence before marking pass.

Preconditions

- MOD-21/22/23 workflow complete with at least one **VERIFIED** result
- Tenant policy flags available on tenant record (billing/critical ack)
- Credentials: docs/AI-QC/manual-qc/.local/001-QC-Credentials.txt

Result template reference

Use docs/AI-QC/manual-qc/results/024-Report-Release-Delivery-Manual-QC-Result-Template-v1.1.md

Core cases (v1.0 carry-forward)

Test Case 1 — Release queue shows verified results

Field	Content
Test Case ID	MOD24-001
Test Case	1. Release queue shows verified results
Objective	Confirm verified laboratory results appear on the report release worklist.
Steps	
	1. Log in as REPORT_OFFICER or LAB_SUPERVISOR.
	2. Open `/lab/report-release`.
	3. Locate a result with clinical status verified and no competing release block.
Expected Result	Release queue shows verified results
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 2 — Prepare release — clinical state unchanged

Field	Content
Test Case ID	MOD24-002
Test Case	2. Prepare → `LabReportRelease` pending; `LabResult` remains verified
Objective	Prepare a release record without mutating clinical verification state.
Steps	

	1. From the worklist, choose a verified result and click Prepare release.
	2. Confirm `LabReportRelease` moves to release pending.
	3. Inspect the linked `LabResult` clinical status.
Expected Result	Prepare → `LabReportRelease` pending; `LabResult` remains verified
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 3 — Authorize release

Field	Content
Test Case ID	MOD24-003
Test Case	3. Authorize → `RPT-` number, snapshot version, QR token
Objective	Authorize release and allocate immutable report artifacts.
Steps	
	1. Open the pending release detail screen.
	2. Authorize release with matching record version.
	3. Review allocated report number, snapshot version, and verification token.
Expected Result	Authorize → `RPT-` number, snapshot version, QR token
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 4 — HTML print includes QR image

Field	Content
Test Case ID	MOD24-004
Test Case	4. HTML print includes QR image
Objective	Verify printable HTML embeds a scannable QR image.
Steps	
	1. Open print view for a released report.
	2. Inspect the verification footer block.
	3. Confirm QR image and verification URL are visible.
Expected Result	HTML print includes QR image
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 5 — PDF download includes QR image

Field	Content
Test Case ID	MOD24-005
Test Case	5. PDF download includes QR image and opens correctly
Objective	Verify downloaded PDF contains embedded QR and opens correctly.
Steps	

	1. Download PDF from release detail.
	2. Open the file in a PDF viewer.
	3. Confirm QR image is present and file is valid.
Expected Result	PDF download includes QR image and opens correctly
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 6 — Reprint requires reason

Field	Content
Test Case ID	MOD24-006
Test Case	6. Reprint requires reason
Objective	Validate reprint governance and audit capture.
Steps	
	1. Print a released report once.
	2. Attempt a second print without a reason.
	3. Provide reprint reason and print again.
Expected Result	Reprint requires reason
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 7 — Portal publish flag

Field	Content
Test Case ID	MOD24-007
Test Case	7. Portal publish flag
Objective	Confirm portal publish flag is set for MOD-30 handoff.
Steps	
	1. Authorize a valid release.
	2. Publish portal flag from release detail.
	3. Verify portal publish timestamp/eligibility state.
Expected Result	Portal publish flag
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 8 — Public QR verify — no PHI

Field	Content
Test Case ID	MOD24-008
Test Case	8. Public QR verify — no PHI
Objective	Verify public token page exposes no protected health information.
Steps	

	1. Copy verification URL or scan QR from released report.
	2. Open `/verify/report/[token]` without authentication.
	3. Review response fields only.
Expected Result	Public QR verify — no PHI
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 9 — Withdraw revokes QR

Field	Content
Test Case ID	MOD24-009
Test Case	9. Withdraw revokes QR
Objective	Confirm withdrawal revokes active verification tokens.
Steps	
	1. Withdraw a released report with reason.
	2. Retry public verification using prior QR/token.
Expected Result	Withdraw revokes QR
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 10 — Amendment re-release

Field	Content
Test Case ID	MOD24-010
Test Case	10. Amendment re-release
Objective	Validate amendment workflow and re-authorization.
Steps	
	1. Initiate amendment on a released report with reason.
	2. Re-authorize amended release.
	3. Confirm new version and token behavior.
Expected Result	Amendment re-release
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

v1.1 polish cases

Test Case 11 — Billing hold policy enforcement

Field	Content
Test Case ID	MOD24-011
Test Case	11. Billing hold enabled (tenant policy) blocks authorize; disabled allows (hold cleared)
Objective	Validate billing hold blocking when tenant policy is enabled.

Steps	
	1. Enable tenant billing clearance policy.
	2. Add manual billing hold on release record.
	3. Attempt authorize; then clear hold and retry with policy disabled if required.
Expected Result	Billing hold enabled (tenant policy) blocks authorize; disabled allows (hold cleared)
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 12 — Quality hold add and clear

Field	Content
Test Case ID	MOD24-012
Test Case	12. Quality hold add blocks; clear allows
Objective	Validate quality hold blocks release until cleared.
Steps	
	1. Add quality hold with reason as authorized supervisor.
	2. Attempt authorize while hold is active.
	3. Clear hold and retry authorize.
Expected Result	Quality hold add blocks; clear allows
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 13 — Critical acknowledgment policy

Field	Content
Test Case ID	MOD24-013
Test Case	13. Critical acknowledgment pending blocks when policy enabled
Objective	Validate critical-result acknowledgment blocking when policy enabled.
Steps	
	1. Enable tenant critical acknowledgment policy.
	2. Use a result with unacknowledged critical event.
	3. Attempt authorize; complete acknowledgment and retry if applicable.
Expected Result	Critical acknowledgment pending blocks when policy enabled
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 14 — Concurrent authorize

Field	Content
Test Case ID	MOD24-014
Test Case	14. Two-browser concurrent authorize — second attempt fails with state changed

Objective	Prevent duplicate authorization under concurrent browser use.
Steps	
	1. Open the same pending release in two browsers/sessions.
	2. Authorize in browser A.
	3. Attempt authorize in browser B without refresh.
Expected Result	Two-browser concurrent authorize — second attempt fails with state changed
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 15 — REPORT_OFFICER authorization

Field	Content
Test Case ID	MOD24-015
Test Case	15. REPORT_OFFICER can authorize
Objective	Confirm REPORT_OFFICER can authorize release.
Steps	
	1. Log in as REPORT_OFFICER.
	2. Prepare and authorize a valid release.
Expected Result	REPORT_OFFICER can authorize
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 16 — LAB_TECH authorization denial

Field	Content
Test Case ID	MOD24-016
Test Case	16. LAB_TECH authorize denied
Objective	Confirm lab technician cannot authorize release.
Steps	
	1. Log in as LAB_TECH.
	2. Attempt authorize on a pending release.
Expected Result	LAB_TECH authorize denied
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 17 — RECEPTION print-only

Field	Content
Test Case ID	MOD24-017
Test Case	17. RECEPTION print-only (no authorize)
Objective	Confirm reception role cannot authorize but may print released reports.
Steps	

	1. Log in as RECEPTION.
	2. Verify authorize action is unavailable or denied.
	3. Print a released report if granted print permission.
Expected Result	RECEPTION print-only (no authorize)
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 18 — TENANT_ADMIN clinical release denial

Field	Content
Test Case ID	MOD24-018
Test Case	18. TENANT_ADMIN without explicit clinical release permission denied
Objective	Confirm tenant admin without explicit clinical permission cannot authorize.
Steps	
	1. Log in as TENANT_ADMIN after RBAC seed/policy review.
	2. Attempt authorize release.
Expected Result	TENANT_ADMIN without explicit clinical release permission denied
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 19 — QR scan from printed HTML

Field	Content
Test Case ID	MOD24-019
Test Case	19. QR scan from printed HTML
Objective	Validate QR scanned from HTML print resolves to public verify page.
Steps	
	1. Print/open HTML report with QR.
	2. Scan QR with mobile device or camera.
	3. Confirm landing on trusted verification URL.
Expected Result	QR scan from printed HTML
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 20 — QR scan from downloaded PDF

Field	Content
Test Case ID	MOD24-020
Test Case	20. QR scan from downloaded PDF
Objective	Validate QR scanned from PDF resolves correctly.
Steps	
	1. Download released report PDF.

	2. Scan embedded QR code.
	3. Confirm verification response.
Expected Result	QR scan from downloaded PDF
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 21 — Withdrawn QR invalid

Field	Content
Test Case ID	MOD24-021
Test Case	21. Withdrawn QR invalid
Objective	Confirm withdrawn report QR/token fails verification.
Steps	
	1. Withdraw a released report.
	2. Scan prior QR or open prior verification URL.
Expected Result	Withdrawn QR invalid
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 22 — Superseded-version QR

Field	Content
Test Case ID	MOD24-022
Test Case	22. Superseded-version QR marked invalid/superseded
Objective	Confirm superseded version token is marked invalid/superseded.
Steps	
	1. Authorize amended release creating new current version.
	2. Verify using prior version QR/token.
Expected Result	Superseded-version QR marked invalid/superseded
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 23 — Bangla HTML print layout

Field	Content
Test Case ID	MOD24-023
Test Case	23. Bangla HTML print layout
Objective	Validate Bangla locale HTML print layout readability.
Steps	
	1. Switch locale to bn-BD.
	2. Open HTML print view for released report.
Expected Result	Bangla HTML print layout

Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 24 — Arabic/Urdu RTL HTML print

Field	Content
Test Case ID	MOD24-024
Test Case	24. Arabic/Urdu RTL HTML print
Objective	Validate RTL HTML print direction and layout.
Steps	
	1. Switch locale to ar-SA or ur-PK.
	2. Open HTML print view and inspect direction/layout.
Expected Result	Arabic/Urdu RTL HTML print
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 25 — Hindi HTML print layout

Field	Content
Test Case ID	MOD24-025
Test Case	25. Hindi HTML print layout
Objective	Validate Hindi locale HTML print layout readability.
Steps	
	1. Switch locale to hi-IN.
	2. Open HTML print view for released report.
Expected Result	Hindi HTML print layout
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 26 — Long multi-page report QR placement

Field	Content
Test Case ID	MOD24-026
Test Case	26. Long multi-page report — QR not clipped
Objective	Ensure QR block is not clipped on multi-page reports.
Steps	
	1. Use a long multi-parameter report.
	2. Print preview across multiple pages.
	3. Inspect QR footer placement.
Expected Result	Long multi-page report — QR not clipped
Actual Result	
Status	NOT RUN

Evidence	
Tester	
Date	
Remarks	

Test Case 27 — Cross-tenant IDOR

Field	Content
Test Case ID	MOD24-027
Test Case	27. Cross-tenant IDOR
Objective	Prevent cross-tenant release access by identifier manipulation.
Steps	
	1. Log in to tenant A.
	2. Attempt to access tenant B release ID/URL directly.
Expected Result	Cross-tenant IDOR
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 28 — Cross-branch IDOR

Field	Content
Test Case ID	MOD24-028
Test Case	28. Cross-branch IDOR
Objective	Prevent unauthorized cross-branch release access.
Steps	
	1. Log in with branch-scoped user.
	2. Attempt to access another branch release record.
Expected Result	Cross-branch IDOR
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks	

Test Case 29 — Portal publish after valid release

Field	Content
Test Case ID	MOD24-029
Test Case	29. Portal publish after valid release
Objective	Confirm portal publish succeeds only after valid release.
Steps	
	1. Authorize valid release.
	2. Publish portal flag.
Expected Result	Portal publish after valid release
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	

Remarks	
---------	--

Test Case 30 — Withdrawal removes portal visibility

Field	Content
Test Case ID	MOD24-030
Test Case	30. Withdrawal removes portal visibility
Objective	Confirm withdrawal removes portal publish eligibility/visibility handoff.
Steps	
	1. Publish portal flag for released report.
	2. Withdraw release.
	3. Verify portal visibility/eligibility state.
Expected Result	Withdrawal removes portal visibility
Actual Result	
Status	NOT RUN
Evidence	
Tester	
Date	
Remarks

Appendix C — Known Limitations

- Automated invoice/payment billing integration is deferred; manual billing hold + tenant policy only.
- PDF output is Latin/Helvetica; multilingual and RTL PDF are not supported (use HTML print for Bangla/Arabic/Urdu/Hindi).
- Existing database TENANT_ADMIN permissions may retain clinical release rights until RBAC re-seed.
- Patient portal UI remains MOD-30 scope; MOD-24 sets portal publish flag only.
- WhatsApp, email, and SMS dispatch are out of scope for this pilot.
