## The First Patient

From Tenant Deployment  
to Successful Treatment

BROWSER PROVEN | EVIDENCE DRIVEN

Doctors Point Diagnostic Center - Bhola Main Branch

Official J-01 Evidence Book | 2026

## FRONT MATTER

# Foreword

Healthcare operations succeed at the hand-offs. This book follows one fictional patient through every hand-off at Doctors Point Diagnostic Center - Bhola Main Branch.

The story is deliberately visual. Each screen answers what happened, who acted, why the action mattered, and how ABSHealthcareLite responded. Every image comes from the completed J-01 browser journey.

The result is more than a demo: it is an evidence chain for onboarding, sales, quality review, training and future operational design.

## FRONT MATTER

# Journey Summary

Nusrat Jahan registered as PT-000009, attended AP-000005, completed encounter EN-000004 and received RX-000004.

INV-000004 was paid in full. LAB-000004 produced two accessions, three verified results and three released reports: RPT-0000012, RPT-0000013 and RPT-0000014.

The patient downloaded the released TSH report, returned to the doctor and received RX-000004 v2. Version 1 remained preserved as superseded.

01

---

# Doctors Point Diagnostic Center

One centre, one branch, one continuous patient story.

## CHAPTER 1

# The Business Story

Doctors Point Diagnostic Center operates one continuous diagnostic journey at BR-BHL-01. Reception, doctors, billing, collection, laboratory, verification and report delivery share one governed patient record.

J-01 proves the centre can move from arrival to treatment without losing identity, financial status, specimen traceability, result provenance or prescription history.

## 02

# Tenant Deployment and Operational Readiness

Governed configuration creates a safe operating foundation.

## CHAPTER 2

# Operational Readiness

J-01 began only after the DPDC tenant, subscription, branch, departments, doctors, users, roles, price list, reference ranges, analyzer/LIS controls and portal capability were available in the verified environment.

The journey did not capture dedicated setup screenshots for each configuration screen. This chapter therefore records the proven readiness outcome without inventing deployment imagery. The DPDC regression verifier confirms the configured tenant, branch, roles, departments, locale, currency and module migrations.

## 03

# Reception

A fictional visitor becomes a safe, searchable patient identity.

STEP 01

# Reception signs in

## STEP 02

# Patient created

Evidence J01-P1-03 | QC PASS

The screenshot displays the ABSHealthcareLite Tenant Workspace interface. On the left is a dark sidebar with navigation options: Patient Registration (highlighted), Patient Search, Book Appointment, Appointments, Queue Dashboard, Consultations, Prescriptions, and Diagnostic Billing / Test Order. The main content area shows the 'Patient Registration' page for 'Doctors Point Diagnostic Center - Bhola Main Branch - DPDC'. A success message states 'Patient registered successfully.' with the assigned patient number 'PT-000009'. Below this are buttons for 'View', 'Register patient', and 'Back to patient search'. The bottom of the sidebar shows the user is 'Nusrat Jahan' with the role 'Reception User - FRWZCAB3'.

ABSHEALTHCARELITE  
Tenant Workspace

BUSINESS GOAL

Turn the paid order into traceable specimens.

WHO / WHERE

Billing / Laboratory | Lab order confirmation

SYSTEM RESPONSE

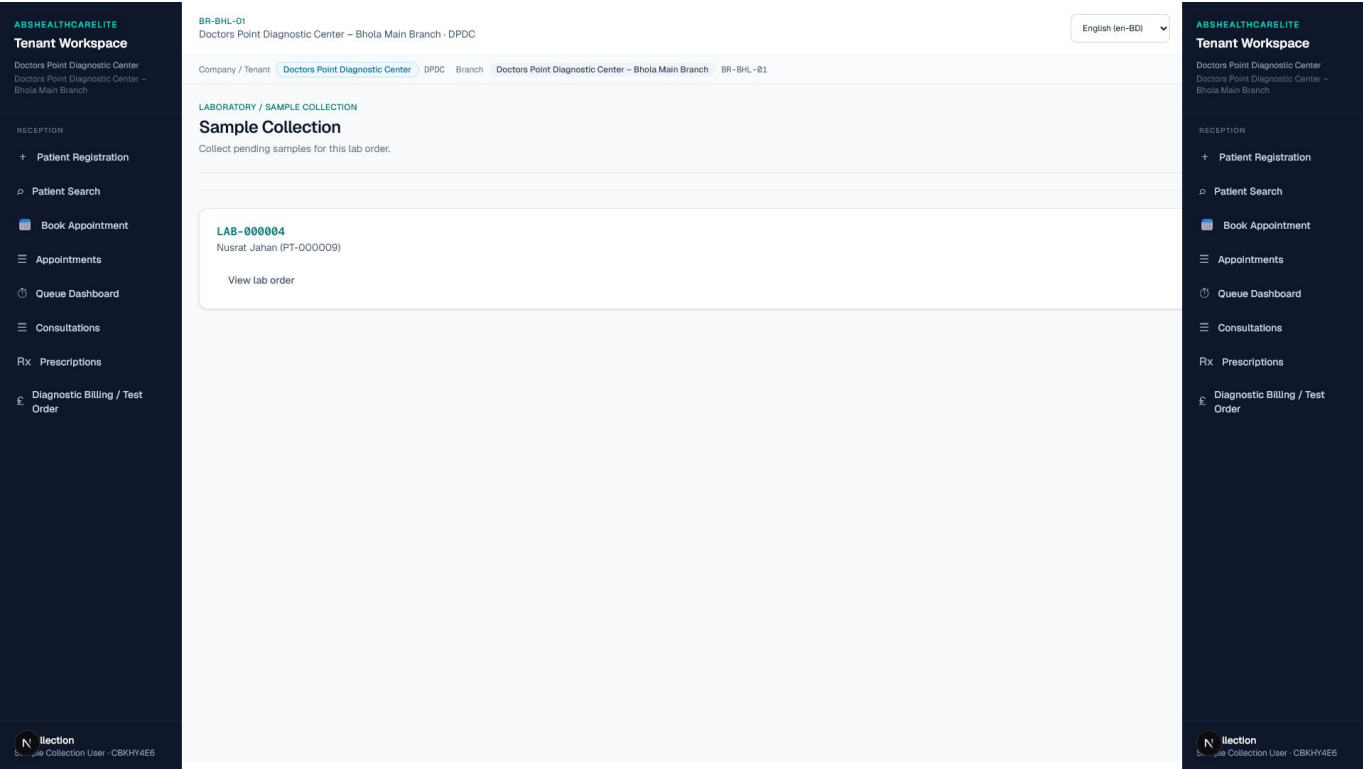

ACC-000011 and ACC-000012 were created.

MODULES MOD-21 | BROWSER UAT PASS | EVIDENCE J01-P1-23

STEP 18

# Collection worklist

Evidence J01-P1-24 | QC PASS

BUSINESS GOAL

Find the right patient and order.

WHO / WHERE

Collection Officer | /lab/collection

SYSTEM RESPONSE

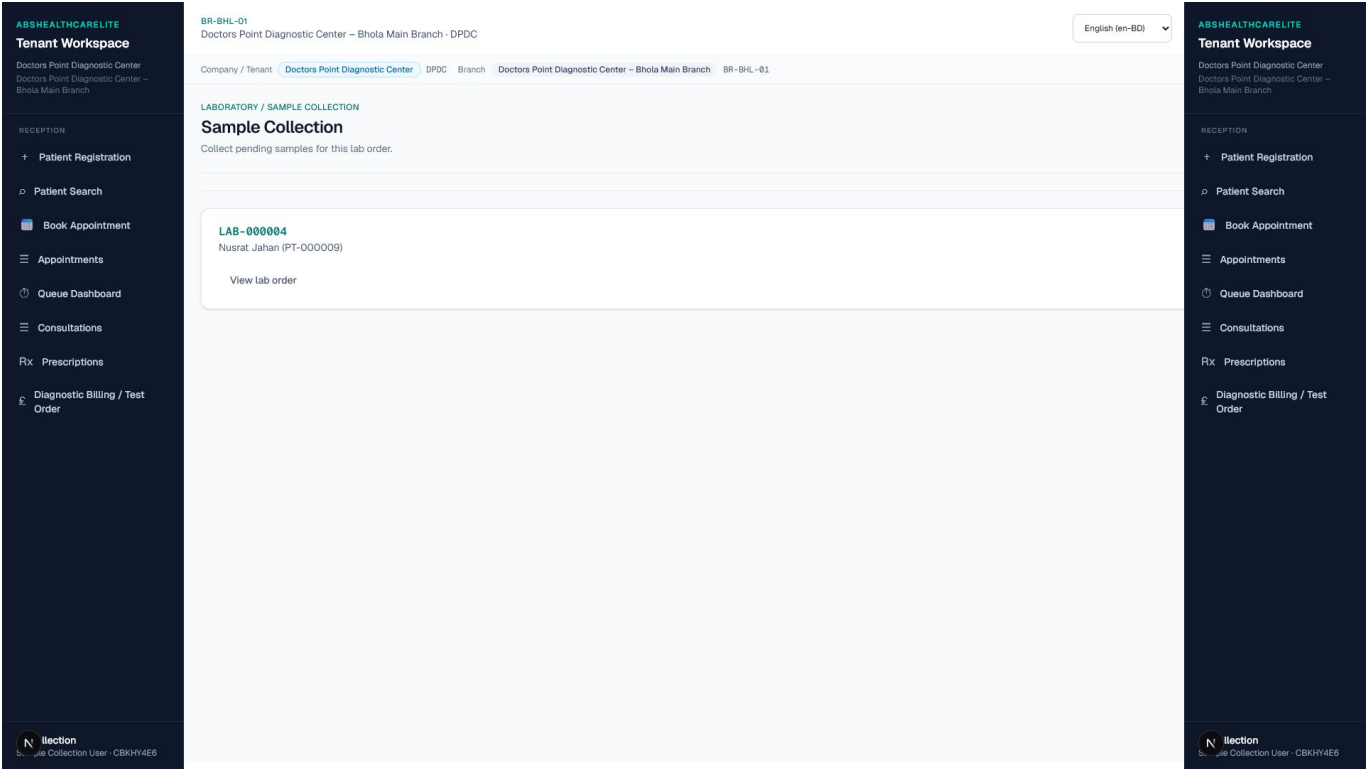

LAB-000004 appeared ready for collection.

MODULES MOD-21 | BROWSER UAT PASS | EVIDENCE J01-P1-24

STEP 19

# Containers determined

Evidence J01-P1-25 | QC PASS

BUSINESS GOAL

Match tests to EDTA and serum containers.

WHO / WHERE

Collection Officer | Collection detail

SYSTEM RESPONSE

CBC and thyroid tests were separated correctly.

MODULES MOD-21 | BROWSER UAT PASS | EVIDENCE J01-P1-25

## STEP 20

## EDTA label

Evidence J01-P1-26 | QC PASS

The screenshot shows the 'Sample Label' page in the ABSHealthcareLite Tenant Workspace. The page is titled 'Sample Label' and includes a sub-header 'LABORATORY / SAMPLE LABEL'. Below this, there is a section for 'Print accession barcode label for sample.' The main content area displays a sample label for 'DOCTORS POINT DIAGNOSTIC CENTER'. The label includes the following information:

- Patient ID: PT-000009
- Order: LAB-000004
- Sample: ACC-000011
- Container: Blood / EDTA Tube
- Collected: 2026-08-01 06:49
- Department: Haematology Laboratory
- Priority: ROUTINE

The label also features a barcode and a QR code. Below the label, there are buttons for 'Print label', 'Reprint label', and 'View sample'.

## BUSINESS GOAL

Create a barcode label for the CBC tube.

## WHO / WHERE

Collection Officer | Label print

## SYSTEM RESPONSE

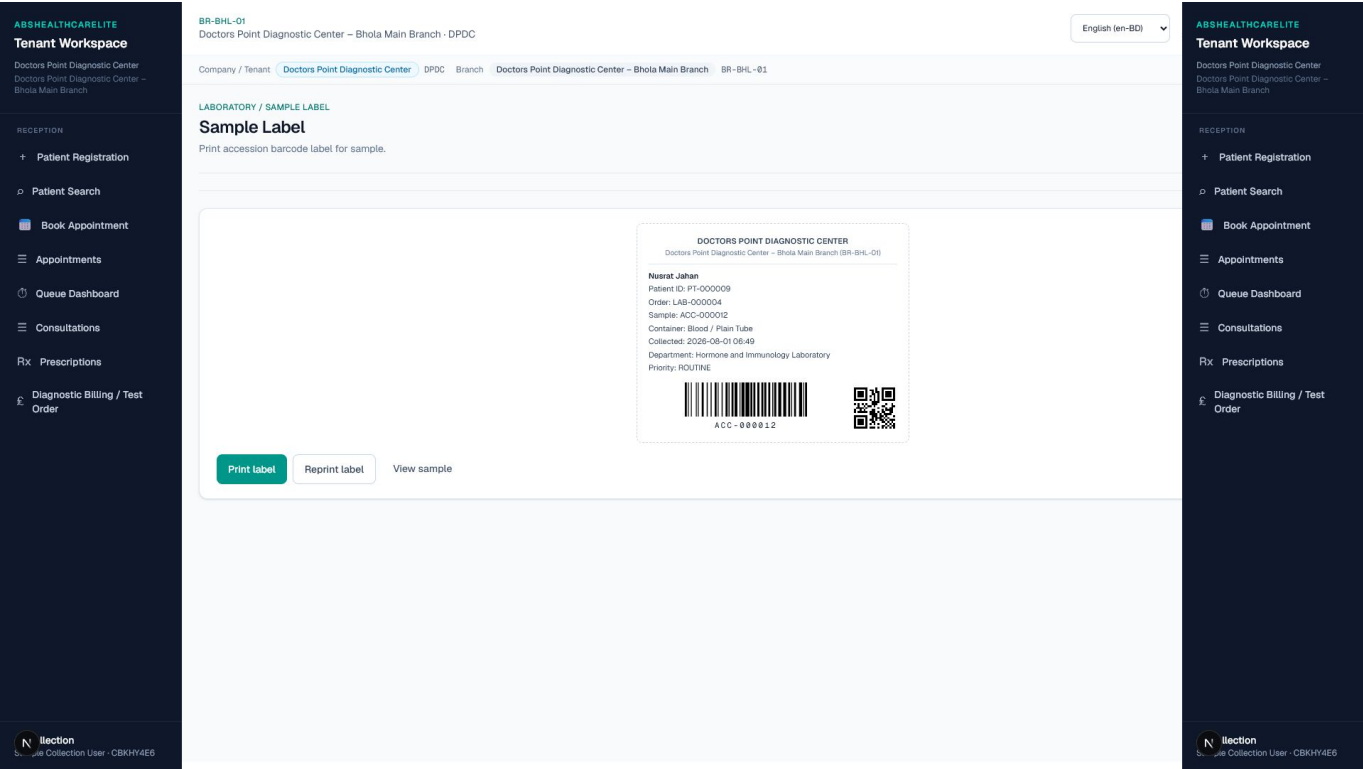

The EDTA label carried the correct accession identity.

MODULES MOD-21 | BROWSER UAT PASS | EVIDENCE J01-P1-26

STEP 21

Serum label

Evidence J01-P1-27 | QC PASS

BUSINESS GOAL

Create a barcode label for the thyroid tube.

WHO / WHERE

Collection Officer | Label print

SYSTEM RESPONSE

The serum label carried the second accession.

MODULES MOD-21 | BROWSER UAT PASS | EVIDENCE J01-P1-27

## STEP 22

# Collection completed

Evidence J01-P1-29 | QC PASS

The screenshot shows the ABSHealthcareLite Tenant Workspace interface. The sidebar on the left contains the following navigation items: Patient Registration, Patient Search, Book Appointment, Appointments, Queue Dashboard, Consultations, Prescriptions, and Diagnostic Billing / Test Order. The main content area is titled 'Sample Collection' and displays the following information:

- Company / Tenant: Doctors Point Diagnostic Center
- DPDC Branch: Doctors Point Diagnostic Center – Bhola Main Branch
- BR-BHL-01
- LABORATORY / SAMPLE COLLECTION
- Sample Collection
- Collect pending samples for this lab order.
- LAB-000004
- Nusrat Jahan (PT-000009)
- View lab order

## BUSINESS GOAL

Record both physical collections.

## WHO / WHERE

Collection Officer | Collection detail

## SYSTEM RESPONSE

Both specimens were collected without duplication.

PRESCRIBER

Dr. Kamrul Hasan  
MBBS, MD (General Medicine)  
General Medicine

CLINICAL SUMMARY

Fictional UAT follow-up: released thyroid reports reviewed; demonstration assessment consistent with hypothyroidism.

MEDICINES

1. Levothyroxine 50 mcg — 1 tablet, OD, 42 day(s)

INVESTIGATIONS

- CBC
- TSH
- Free T4

FOLLOW-UP

Fictional UAT only. Take medicine as directed and return for review.  
Repeat TSH in 6 weeks.

This is a computer-generated prescription. Verify before dispensing.

**BUSINESS GOAL**

Confirm the finalized patient-facing prescription.

**WHO / WHERE**

Dr. Kamrul Hasan | /prescriptions/{id}/print

**SYSTEM RESPONSE**

The print showed treatment and repeat TSH instruction.

BUSINESS GOAL

Close the first-patient story with treatment completed.

WHO / WHERE

Patient and care team | Prescription history

SYSTEM RESPONSE

The current v2 and preserved v1 provided the final auditable state.

MODULES J-01 | BROWSER UAT PASS | EVIDENCE J01-P3-16

## APPENDIX

# Browser UAT Summary

## Verdict

PASS after corrective fixes. The complete journey was exercised in the in-app browser against DPDC / BR-BHL-01.

## Continuous records

PT-000009, AP-000005, EN-000004, RX-000004, INV-000004 and LAB-000004 remained the operational backbone.

## Evidence

49 readable selected images in this volume; 91 original captures remain in the three evidence directories.

## APPENDIX

# AI QC and Regression

## Automated checks

verify:dpdc, verify:mod19, verify:mod24, the Part 3 state verifier and changed-file lint passed.

## Read-only proof

Portal isolation, PDF access audit, report publication and prescription version state were confirmed without database mutation.

## Build caveat

The repository-wide build reaches type checking but is blocked by the unrelated temporary script scripts/tmp-case3-status.ts importing PrismaClient from @prisma/client.

## APPENDIX

# Defects and Fixes

**Part 1**

DOB persistence, server/client mapping and timezone issues were corrected; the cancelled pre-fix appointment remains auditable.

**Part 2**

The first fictional CBC analyzer payload used the wrong count scale. Safety flags worked; a second audited message corrected WBC and platelet values.

**Part 3**

The patient lacked portal enrollment at baseline. Approved tenant-admin counter enrollment resolved the configuration gap without direct DB editing.

## APPENDIX

# Modules and Lessons

**Coverage**

Authentication, tenant/branch, patient, appointment, consultation, prescription, billing, collection, LIS, result entry, verification, release, notification and portal.

**Lesson**

Operational readiness includes portal enrollment, not only report publication.

**Lesson**

Analyzer units and reference ranges must be aligned before result submission.

**Lesson**

Immutable clinical revisions make follow-up safer and easier to audit.

## APPENDIX

# Known Limitations and Next Journeys

## Limitations

No notification-outbox UI, patient-facing access-audit UI or dedicated Journey Complete entity. Some laboratory localization keys remain incomplete.

## Clinical boundary

All patient, result, diagnosis and treatment content in this book is fictional UAT data, not medical advice.

## Future journeys

Emergency care, inpatient admission, pharmacy dispensing, imaging, corporate billing and referral workflows should receive their own evidence books rather than extending J-01.
